

AN INTRODUCTION TO PASCAL

Notes for MIS 387

Derek R. O'Connor

Management Information Systems Dept.
University College, Dublin

Chapter 1	Introduction	1
1.1	Hardware and Software	
1.2	Information Representation	
1.3	Algorithms	
1.4	Programs	
Chapter 2	An Introduction to Pascal	2
2.1	General Form of a Pascal Program	
2.2	Syntax or Grammar	
2.3	Semantics or Meaning	
Chapter 3	Elementary Data Types	3
3.1	Integers	
3.2	Reals	
3.3	Booleans	
3.4	Characters and Strings	
Chapter 4	Elementary Statements	4
4.1	Expressions	
4.2	Assignment Statements	
4.3	Input and Output Statements	
4.4	Function and Procedure Statements	
Chapter 5	Control Structures	5
5.1	Sequence	
5.2	Selection or IF-THEN-ELSE	
5.3	Repetition or WHILE and FOR loops	
Chapter 6	Procedures and Functions	6
6.1	Modularity	
6.2	Procedures and Parameter passing	
6.3	Functions	
Chapter 7	Text Files	7
7.1	Introduction	
7.2	Text Files	
7.3	Connecting Internal and External Files	
7.4	Opening and Closing Internal Files	
7.5	Reading and Writing Text Files	
7.6	General Procedures for Opening Files	
7.7	Summary of Text File Procedures and Functions	

Chapter 8	Data Structures	8
8.1	Arrays	
8.2	Records	
8.3	Combined Data Structures	
Chapter 9	Sorting & Searching	9
9.1	Insertion Sort	
9.2	Selection Sort	
9.3	QuickSort	
9.4	Sequential Search	
9.5	Binary Search
